EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Programming & Application Development: Java, Python, JavaScript/TypeScript, Spring Boot, FastAPI, React, REST APIs, coding fixes and new software development

Core Concepts: Object Oriented Programming concepts, Database concepts, data structures, testing, debugging, Data Analytics

Databases & CRM: PostgreSQL, MongoDB, Redis, SQL, multi-agent CRM, basic programming knowledge on Java/.Net/Data Analytics/CRM

Production & Cloud: production and test systems, Git, CI/CD, Docker, AWS (S3, Lambda, Step Functions, CloudWatch), deployments

Professional: excellent communication skills, willing to learn new/ updated technologies, occasional after hours / weekend support

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Developed and supported custom applications for a multi-agent **CRM** platform using **Python**, FastAPI, LangGraph, and LangChain, routing requests across 40+ specialized agents with secure access control for 10,000+ users
- Delivered coding fixes and new software development across a **React**, TypeScript, and Temporal workflow system, enabling customers to create, run, monitor, and resume production agent workflows
- Managed and supported production and test systems through GitHub Actions **CI/CD**, OpenTelemetry trace-based evaluations, and release gates that detected latency, accuracy, and safety issues before deployments
- Applied **Object Oriented Programming concepts** and API abstractions to a FastMCP service exposing 160+ validated backend actions, improving reliable automation of customer CRM workflows

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Developed and supported a custom storage application in **Java** and **Spring Boot**, applying object-oriented interfaces to file uploads, downloads, and deletions across Google Cloud Storage, S3, and MinIO via expiring signed URLs
- Strengthened **Database concepts** in production by optimizing **PostgreSQL** window functions, materialized views, and indexes, reducing query latency and surfacing Data Analytics through interactive React visualizations
- Managed production workloads with AWS Step Functions and Lambda, improving timeout recovery and operational reliability across 100K+ weekly executions while supporting maintainable deployments

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Developed a custom distributed application that models coding work as dependency-aware task DAGs, executes it across multiple machines, and applies retries and timeout handling for reliable test and production-style runs
- Used modular interfaces and **Object Oriented Programming** design principles to isolate scheduling, execution, and failure recovery, demonstrating the ability to learn new/ updated technologies
