EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Rust
Frameworks: React, FastAPI, Sprint Boot, FastMCP, LangChain, LangGraph, LangSmith, PyTorch
Databases: PostgreSQL, MongoDB, Redis
AWS Services: API Gateway, Lambda, Step Functions, CloudWatch, EC2, RDS, S3, CloudFormation, CloudFront
Others: Node.js, CI/CD, Kafka, Git, Google Cloud
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Built cloud backend services and partner APIs for an MCP layer translating intents into safe, validated tool calls across 1000+ endpoints, enabling scalable integrations (including RMS, CAD, and LPR flows) with low Professional Services overhead - Implemented observability with Langfuse and LangSmith (tracing, structured logs, evaluation hooks) to resolve complex integration bugs and streaming issues, then optimized routing for strict latency requirements and high availability in a mission-critical environment (latency —60%, API costs —50%)	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on StyleGAN and Stable Diffusion using CUDA, PyTorch, and LORA (Low-rank Adaptation) on Pace University's HPC cluster, building reproducible real-time training and inference pipelines - Utilized vLLM and Hugging Face to deliver secure model serving patterns for cloud services and APIs, and led workshops on CUDA, Mojo, LangChain, LangGraph, and LangSmith for +50 students	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed a cloud-agnostic storage integration service with Python, PostgreSQL, and Redis (SQL and NoSQL databases) across Google Cloud Storage, S3, and MinIO using expiring signed URLs - Delivered full-stack IAM features with React, Sprint Boot, and AWS, shipping frontend components and backend workflows for 30+ applications, plus AWS Step Functions orchestration to prevent AWS Lambda timeouts in long-running imports	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built an event-driven orchestrator that owns PTY IO, validates each command before shell execution, and broadcasts real-time updates without polling - Implemented secure distributed ralph loops with Y-crdt for low-latency, multi-machine coordination across continuous integration workflows
