EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Databases: PostgreSQL, Redis, MongoDB
Others: Git, CI/CD, Node.js, Kafka, Google Cloud
AWS Services: CloudWatch, Lambda, Step Functions, S3, RDS, EC2, API Gateway, CloudFormation, CloudFront
Languages: Python, Java, JavaScript/TypeScript, Rust
Frameworks: Sprint Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, React, PyTorch
AI: Codex, Claude code, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Owned production application support for the MCP interaction layer, converting operational support tickets into targeted fixes across 1000+ platform endpoints and using troubleshooting telemetry (tracing, structured logs, evaluation hooks) in Langfuse and LangSmith to resolve failures quickly. - Coordinated production deployments with release readiness checks, smoke testing, and post-deployment verification; improved KV-cache hit rate, cut latency by 60%, and reduced LLM API cost by 50%.	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Implemented secure inference and deployment validation with vLLM and Hugging Face, troubleshooting throughput issues through structured logs and performance checks while leading technical workshops for +50 students. - Ran repeatable training, testing, and validation workflows for StyleGAN and Stable Diffusion using CUDA, PyTorch, and LORA (Low-rank Adaptation) on Pace University's HPC cluster.	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built an internal support chatbot using LangChain and RAG with a PostgreSQL vector store, reducing average ticket resolution time by 20% through faster triage, issue reproduction, and SQL-backed retrieval. - Designed and developed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis for secure file transfers across Google Cloud Storage, S3, and MinIO, and delivered batch jobs with AWS Step Functions under disciplined change-management procedures.	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built PTY-based command orchestration with pre-execution safety checks and auditable logs for reliable troubleshooting and rollback-aware operations. - Implemented event-driven loops and Y-crdt signaling for real-time status propagation, an operational pattern for EDI transaction monitoring and claims management systems continuity. - Documented deterministic execution and failure-handling steps to support repeatable deployment procedures and operational runbooks.
