EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, Java, Rust, JavaScript/TypeScript
AWS Services: API Gateway, S3, Lambda, Step Functions, EC2, RDS, CloudWatch, CloudFormation, CloudFront
Others: CI/CD, Git, Kafka, Google Cloud, Node.js
Databases: PostgreSQL, Redis, MongoDB
Frameworks: FastAPI, Spring Boot, LangGraph, LangChain, PyTorch, React

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architected high-throughput payload transformation via Go templating (conditionals/loops) to integrate 1000+ platform endpoints with 3rd-party providers, ensuring reliable system-to-system integration - Designed parameterized templates for dynamic JSON enrichment and JQ filtering, enabling seamless composition of requests and responses for downstream payment systems - Leveraged Kubernetes and Helm for cloud-native deployment of REST-based APIs, maintaining versioned, Go template-driven configurations across DEV, QA, and PROD environments	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted generative model research using PyTorch and CUDA on an HPC cluster, managing the full lifecycle from data mapping to inference optimization with vLLM - Led technical workshops on building AI Agents and GPU programming for 50+ students, demonstrating strong debugging and technical communication skills	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed cloud-agnostic Storage Service using Python, PostgreSQL, and Redis across AWS S3, GCP, and MinIO, implementing standardized error handling and decline mapping - Developed distributed AWS Step Functions workflows to orchestrate long-running data import jobs, ensuring reliable reconciliation impacts and preventing integration failures	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Orchestrated distributed AI coding loops with event-driven updates and PTY control, showcasing deep understanding of payload structure and orchestration frameworks - Implemented real-time coordination using Y-crdt, ensuring data integrity across high-throughput agentic workflows
