EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, Rust, Html/Css

Backend & Frameworks: React, FastAPI, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, Redis, MongoDB

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Built a full-stack **React** and **TypeScript** visual workflow platform with **FastAPI** backend giving users end-to-end control of product surfaces — from intuitive user-facing interfaces to durable **Temporal**-powered resumable execution handling complex business logic at scale
- Built a **multi-agent** CRM platform in **Python**, **LangGraph**, and **FastAPI** with tenant-aware access control via JWT propagation, serving 10,000+ users by routing complex business logic across 40+ specialized sub-agents with secure multi-customer isolation
- Created a **FastMCP** server exposing 160+ backend actions to AI agents, automating partner-facing CRM workflows across multiple customers with built-in **OpenTelemetry** monitoring for production reliability, debugging, and continuous improvement
- Built **GitHub Actions** CI/CD pipelines with **OpenTelemetry** trace-based evals scoring latency, accuracy, and safety — gating every deploy and upholding high standards for code quality, system design, and correctness across production systems serving thousands of users
- Built **LlamaIndex**-powered **RAG** agents using **OpenAI** embeddings and **Pgvector** to answer product questions and generate ready-to-run **REST** API examples, accelerating partner onboarding and reducing support load

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** handling file uploads, downloads, and deletions across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs — a production system with direct operational and financial impact
- Improved **PostgreSQL** query performance using window functions, materialized views, and indexes to reduce latency and scale throughput, then exposed business-critical data through interactive **React** dashboards for cross-functional stakeholders
- Orchestrated long-running jobs with **AWS Step Functions**, eliminating **Lambda** timeouts and improving error recovery and production reliability across **100K+** weekly executions

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator in **Elixir** and **TypeScript** that decomposes complex requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries and timeout handling — demonstrating end-to-end ownership of complex production systems
