EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

AWS Services: ECS, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway, EC2
Databases: PostgreSQL, MongoDB, Redis
Languages: Python, JavaScript/TypeScript, Java, Rust
Frameworks: React, FastAPI, Next.js, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, Sprint Boot
AI Tools: Claude Code, Codex, Pi coding-agent
Others: Terraform, Git, GitHub Actions, CI/CD, Kafka, Node.js, Google Cloud, Datadog (monitoring)

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architect reliable, fault-tolerant AI interaction layers using Claude Code, translating natural-language intents into safe, validated tool calls across 1000+ platform endpoints - Design concurrent multi-agent systems with LangChain and LangGraph, ensuring scalability and coordination across complex high-volume workflows and microservices - Establish a robust monitoring layer using LangSmith for tracing, structured logs, and evaluation hooks to track system performance and debug failures in real-time	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Researched StyleGAN and Stable Diffusion using CUDA and PyTorch for model fine-tuning, leveraging HPC clusters for high-volume data processing of industry designs - Optimized model inference with vLLM and Hugging Face, ensuring performant model serving while adopting security best practices throughout the deployment lifecycle	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis that handles high-volume file operations in AWS S3 and Google Cloud via expiring signed URLs - Developed backend microservices and workflows using AWS Step Functions and Lambda to process data import jobs, ensuring fault-tolerance and preventing system timeouts - Built a support chatbot using LangChain and RAG with PostgreSQL, reducing ticket resolution time by 20% via efficient caching and natural language search over docs	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crosstern, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
Engineered a real-time orchestration system for AI coding CLIs using PTY to intercept and validate shell commands, ensuring secure execution of agentic loops across distributed machines
