EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Frameworks: FastAPI, LangGraph, LangChain, FastMCP, LangSmith, PyTorch, React, Sprint Boot

Languages: Python, JavaScript/TypeScript, Java, Rust

Databases: PostgreSQL, Redis, MongoDB

Others: Google Cloud, CI/CD, Git, Node.js, Kafka

AI: Codex, Claude code, Pi coding-agent

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Spense

Feb 2026 - present

- Developed and delivered an MCP AI interaction layer translating natural-language intents into **safe, validated tool calls** across **1000+ platform endpoints**, enabling **LLM-powered automation tools** for **clinical reporting workflows**, document generation workflows, and **AI-driven code generation pipelines** with **human-in-the-loop** quality gates.
- Architected **multi-agent systems** in **LangGraph (Lang Graph)**, **LangChain (Lang Chain)**, and **Google ADK on Google Vertex AI**; built document understanding and **RAG pipelines** for **PDFs** and **Word/DOCX** extraction, parsing, table detection, and structure recognition, then optimized observability and concurrency to cut latency by **60%** and LLM API costs by **50%**.

AI Researcher

New York City, NY

Pace Artificial Intelligence Lab

Sep 2025 - Dec 2025

- Conducted research on **StyleGAN** and **Stable Diffusion** using **CUDA**, **PyTorch**, and **LORA (Low-rank Adaptation)** on Pace University's **HPC cluster**, evaluating fine-tuning vs zero-shot strategies and model quality across iterative cycles.
- Utilized **vLLM** with **Hugging Face** deployment to prototype reproducible evaluation workflows (output-quality scoring, benchmark comparisons, reliability checks), and led workshops on **CUDA**, **Mojo**, **LangChain**, **LangGraph**, and **LangSmith** for **+50** students.

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Built an internal support chatbot using **LangChain** and **RAG** (Retrieval-Augmented Generation) with a **PostgreSQL** vector store, reducing average ticket resolution time by **20%** and improving document intelligence on unstructured sources.
- Designed a cloud-agnostic Storage Service in **Python**, **PostgreSQL**, and **Redis** for uploads/downloads/deletions across **Google Cloud Storage**, **S3**, and **MinIO** (clean, well-tested, maintainable Python code, design patterns, **SOLID principles**, **single responsibility**, **dependency inversion**, **interface segregation**), and containerized ingestion services with **Docker** plus **AWS Step Functions** for reliable long-running imports.

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs | Crossterm, Ratatui, Y-crdt

github.com/ozzyozbourne/dark-factory

- Enables full ownership of CLI IO via **PTY** with command validation before shell execution, supporting secure AI-assisted development loops with **Gemini CLI** and **GitHub Copilot**.
- Allows secure distributed **ralph** loops across machines with **Y-crdt** coordination and event-driven multi-agent updates, reducing polling overhead while preserving debuggability.
