EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust
AWS Services: API Gateway, Lambda, Step Functions, EC2, RDS, S3, CloudWatch, CloudFormation, CloudFront
Frameworks: Sprint Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, React
Databases: PostgreSQL, Redis, MongoDB
Others: Google Cloud, CI/CD, Kafka, Node.js, Git
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Developed and delivered an MCP AI interaction layer that translates natural-language intents into safe, validated tool calls across 1000+ platform endpoints, designing backend microservices and APIs for automated customer actions, backend automation, and software testing on distributed systems - Enabled an observability layer with Langfuse and LangSmith (tracing, structured logs, evaluation hooks) across Linux services, speeding root-cause analysis over TCP/IP, DNS, and DHCP while coordinating reliable execution across cloud platforms and machine learning infrastructure that reduced latency by 60% and LLM API costs by 50%	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on StyleGAN and Stable Diffusion using CUDA, PyTorch and LORA (Low-rank Adaptation) on Pace University's HPC cluster, building repeatable training data pipelines - Utilized vLLM for model inference with Hugging Face deployment, hardening AI/ML serving workflows for secure, efficient distributed computing	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed and developed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis that handles uploads, downloads, and deletions in Google Cloud Storage, S3, and MinIO through expiring signed URLs and service APIs for AWS and GCP environments with Azure-portable abstractions - Contributed to the development of an Identity & Access Management platform using React, Spring Boot, and AWS, supporting thousands of users across 30+ applications through reliable backend microservices and AWS Step Functions workflows that prevented AWS Lambda timeouts and improved analytics platforms resiliency	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Enables full ownership of CLI IO via PTY, checking and logging every command before bash execution to enforce safe, auditable backend automation - Allows secure distributed ralph loops across machines using Y-crdt with event-driven agentic orchestration and real-time updates that eliminate polling overhead
