EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust, Html/Css

Backend & Frameworks: Spring Boot, FastAPI, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, MongoDB, Redis

AWS Services: S3, Lambda, Step Functions, EC2, RDS, CloudWatch, CloudFormation, CloudFront, API Gateway

Others: Docker, Kubernetes, Git, CI/CD, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built **event-driven, real-time** backend services in **Python** and **FastAPI** routing requests across 40+ specialized sub-agents with tenant-aware **JWT** access control and **OpenTelemetry** instrumentation, serving 10,000+ concurrent users
- Designed an **asynchronous** workflow orchestration platform using **Temporal** and **Redis** for durable, resumable execution of **distributed** long-running tasks, surfaced via a **React** and **TypeScript** visual editor with live progress tracking
- Built a production **FastMCP** server exposing 160+ **RESTful API** endpoints with **Pydantic** schema validation, **OpenTelemetry** monitoring and logging, and **secure** multi-tenant access control across backend services
- Built GitHub Actions **CI/CD** pipelines with **OpenTelemetry** trace-based eval suites flagging latency regressions, tool-call accuracy issues, and unsafe behavior before every production deployment; integrated **agentic code review** automation reducing manual PR triage across 25–30 PRs/week

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic **Storage Service** in **Java** and **Spring Boot** with **PostgreSQL** and **Redis**, handling file uploads, downloads, and deletions across **AWS S3**, **Google Cloud Storage**, and **MinIO** via expiring signed URLs for **secure, scalable** distribution
- Orchestrated **event-driven** long-running jobs with **AWS Step Functions**, **Lambda**, and **message queues**, improving error recovery and **observability** across **100K+** weekly executions while eliminating timeout failures through **asynchronous** distributed workflows
- Optimized **PostgreSQL schema design** with window functions, materialized views, and composite indexes to cut query latency; exposed insights via interactive **React** dashboards for business stakeholders and contributed to **incident response** workflows

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a **distributed** coding-agent orchestrator in **Elixir** and **TypeScript** that decomposes large requests into dependency-aware task **DAGs**, executing them across multi-machine agents with **asynchronous** retries and timeout handling
- Implemented fault-tolerant **event-driven** task scheduling with **real-time** status propagation across distributed nodes, enabling reliable execution of concurrent, interdependent **distributed systems** workflows at scale
