EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust, Html/Css

Backend & Frameworks: Spring Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, Langfuse, React

Databases: PostgreSQL, MongoDB, Redis

AWS Services: S3, Lambda, Step Functions, EC2, RDS, CloudWatch, CloudFormation, CloudFront, API Gateway

Others: CI/CD, Git, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Built **GitHub Actions CI/CD** pipelines for AI-agent deployments with integrated **OpenTelemetry** trace-based automated test suites that develop, execute, and verify each release against expected outcomes — scoring latency, accuracy, and safety issues prior to production delivery
- Built an agentic **automated** code review pipeline in **Python** integrating **OpenAI Codex** with a custom Bitbucket **MCP** server, developing and executing test cases to verify **code quality** across 25–30 PRs/week — reducing manual reviewer load across the delivery lifecycle
- Built a **multi-agent** CRM platform using **Python**, **LangGraph**, **LangChain** and **FastAPI**, serving 10,000+ users by routing requests across 40+ specialized sub-agents with secure tenant-aware **JWT** access control and **AGILE**-driven iterative delivery
- Created a **FastMCP** server exposing 160+ backend actions to AI agents with built-in **OpenTelemetry** monitoring and **Pydantic** validation, enabling automated **Python**-driven workflow execution across multiple customers
- Built **LlamaIndex**-powered **RAG** agents using OpenAI embeddings and **PostgreSQL** pgvector to answer product questions and generate validated, ready-to-run REST API examples — applying strong **database** design and query patterns throughout

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis**, then developed and executed automated test cases verifying file upload, download, and deletion workflows across **S3**, **Google Cloud Storage**, and **MinIO** prior to business acceptance testing
- Analyzed and optimized **PostgreSQL** with window functions, materialized views, and indexes to reduce query latency and improve scalability; validated results against expected outcomes via interactive **React** visualizations for stakeholder acceptance
- Orchestrated **Java**-based long-running jobs with **AWS Step Functions** during platform migration, reducing **Lambda** timeouts and improving error recovery across **100K+** weekly executions while maintaining deployment documentation and operating manuals

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that performs high-level **technical analysis** to break large requests into dependency-aware task DAGs, executing automated retry and timeout logic across multi-machine AI agents with verified outcomes
