EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Rust, Python
Frameworks: FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, React, Sprint Boot
Databases: PostgreSQL, MongoDB, Redis
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
AI: Claude code, Codex, Pi coding-agent
Others: Git, CI/CD, Kafka, Node.js, Google Cloud

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Developed an MCP AI interaction layer translating natural-language intents into safe tool calls across 1000+ endpoints, utilizing test-driven development and software test automation - Built generative code solutions (API templates, SDK patterns) from the product backlog via iterative development and user stories estimation, accelerating integrations - Optimized prompt routing and concurrency to maximize KV-cache hit rate, reducing latency by 60% and LLM costs by 50%, validating deliverables against acceptance tests	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Researched StyleGAN and Stable Diffusion for industry-standard designs using CUDA, PyTorch, and LORA, driving agile development and executing unit test code - Utilized vLLM for model inference and Hugging Face deployment, assuring secure model serving by strictly adhering to core infrastructure and security standards	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis, managing files in S3 and MinIO via signed URLs; ensured integrity through automated test scripts - Contributed to an Identity & Access Management platform using React, Spring Boot, and AWS for thousands of users, sizing user stories for iterative development - Developed backend workflows using AWS Step Functions to manage long-running data imports, preventing AWS Lambda timeouts, testing deliverables against a user story's acceptance tests	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Enables full ownership of CLI IO via PTY, executing unit test code and checking every command before bash execution - Allows secure distributed ralph loops across machines using Y-crdt to signal on each iteration, applying test-driven development
