EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY Jan 2024 - Dec 2025
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Go, Python, Rust, Java, JavaScript/TypeScript
Backend: FastAPI, FastMCP, LangGraph, LangChain, Spring Boot, Node.js
Databases: PostgreSQL, MongoDB, Redis
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Infrastructure: Google Cloud, Git, CI/CD, Kafka, Docker

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ Feb 2026 - present
- Architected end-to-end backend module translating natural-language intents into safe, validated tool calls across 1000+ platform endpoints, enabling automated customer actions with high autonomy and fast feedback loops - Built data connectors, API integration workflows, and agent-based systems (API-aware templates, SDK patterns, code-generation) to accelerate platform adoption and ensure backend implementation correctness across distributed systems - Designed concurrent multi-agent orchestration system using LangChain and LangGraph, owning module end to end from architecture to production with scalable tool execution - Optimized backend performance through prompt routing, vector serialization, and agent concurrency, reducing latency by 60% and API costs by 50%	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY Sep 2025 - Dec 2025
- Conducted research on StyleGAN and Stable Diffusion for fashion design generation, leveraging CUDA, PyTorch, and LORA on Pace University's HPC cluster for distributed model training - Owned full model development lifecycle from data preparation to production deployment, utilizing vLLM for inference optimization and Hugging Face for secure model serving - Led technical workshops on GPU programming with CUDA, Mojo, and building AI Agents with LangChain and LangGraph for 50+ students	

Software Engineer Qualitest	Noida, India Feb 2021 - Dec 2023
- Designed cloud-agnostic Storage Service using Python, PostgreSQL, and Redis handling file operations across AWS S3, Google Cloud Storage, and MinIO via expiring signed URLs, demonstrating architectural decisions and tradeoffs in multi-cloud environments - Developed backend workflows using AWS Step Functions to orchestrate long-running data import jobs and prevent AWS Lambda timeouts, ensuring reliable distributed process execution - Built internal support chatbot using LangChain and RAG with PostgreSQL vector store, reducing ticket resolution time by 20% through natural language queries - Contributed to Identity & Access Management platform using React, Spring Boot, and AWS, supporting thousands of users across 30+ applications	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Enables full CLI IO ownership via PTY, checking and logging every command before execution, demonstrating systems-level thinking and architectural ownership - Implements secure distributed ralph loops using Y-crdt for real-time coordination, showcasing distributed systems design patterns
