EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

AI/Agents: LangGraph, LangChain, LlamaIndex, LangSmith, Langfuse, FastMCP, Claude Code, Codex
Languages: Python, JavaScript/TypeScript, Go, Java
Backend & Frameworks: FastAPI, Spring Boot, React
Others: Docker, Kubernetes, Git, CI/CD
Databases: PostgreSQL, Redis, MongoDB
AWS Services: API Gateway, Lambda, CloudWatch, Step Functions, S3, EC2, RDS, CloudFormation, CloudFront

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Designed secure AI-powered applications and core platform services for CRM copilots with LangGraph, LangChain, FastAPI, and Langfuse observability (logging, metrics, tracing, dashboards), mapping tenant controls to a local-first AI environment. - Refactored 500+ backend operations into model access and routing dispatchers for model endpoints, inference routing, and task-scoped tools, replacing 60+ REST tools with tool calling, structured outputs, and API contracts. - Built LlamaIndex RAG pipelines and retrieval services for enterprise search/Q&A using document processing, parsing, chunking, metadata enrichment, embeddings, indexing, vector search, and ranking strategies, improving tool selection accuracy by 90%.	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Built an agent-evaluation pipeline with LLM judges and reward models to rank tool-use runs by answer quality, groundedness, reliability, and operational performance. - Implemented LangGraph offline evaluation workflows for regression testing, scoring runs, selecting traces, and tuning prompts to increase tool-call success by 50%. - Supported model-serving experiments with vLLM, Hugging Face Transformers, and GPU-backed inference, producing technical documentation and runbooks for mixed stakeholders.	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built deployment pipelines with GitHub Actions, Docker, Git, CI/CD, and containerized deployment, improving release reliability for backend services. - Orchestrated data workflows with AWS Step Functions, AWS Lambda, and CloudWatch, improving error recovery across 100K+ weekly executions. - Supported Linux-based environment operations, application observability, application monitoring, production support, troubleshooting, and root-cause analysis across APIs.	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript</i>	github.com/ozzyozbourne/dark-factory
- Built a distributed coding-agent orchestrator that turns large requests into dependency-aware task DAGs executed across multi-machine AI agents with retries and timeout handling. - Implemented workflow orchestration for background services, typed task handoffs, operational support, traceability, and maintainable agentic behavior.
