EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Backend & Frameworks: LangGraph, LangChain, FastMCP, LangSmith, Langfuse, Google ADK, OpenAI Agents SDK, LlamaIndex, FastAPI, Spring Boot, React

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Databases: PostgreSQL, MongoDB, Redis

Languages: Java, JavaScript/TypeScript, Python, Rust, Html/Css

Others: Git, CI/CD, Docker, Kubernetes, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Built a **multi-agent** CRM platform in **Python**, **LangGraph**, **LangChain**, and **FastAPI** for 10,000+ users, routing requests across 40+ specialized sub-agents as an **AI-native** agentic system built on **agentic frameworks** with secure access control, shared **state management**, and production **observability**
- Shipped an **agentic code review** pipeline integrating **OpenAI Codex** with a custom Bitbucket **MCP** server, using **AI-assisted development tools**, **code generation**, and **prompt engineering** to automate daily PR triage across 25-30 PRs/week and reduce manual reviewer load by several hours
- Built a **React Flow** and **TypeScript** visual workflow platform for agentic swarms, using **Temporal** for durable, resumable execution and explicit handling of long-running workflow state and failures
- Created a **FastMCP** server exposing 160+ backend actions for safe tool use, monitoring, and reusable automation across multiple customers, with built-in **OpenTelemetry** instrumentation
- Built GitHub Actions **CI/CD** pipelines with **OpenTelemetry** trace-based evals to measure latency, accuracy, safety, and non-determinism across prompts and model versions, keeping **inference cost awareness** front and center before production deploys

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** that handles file uploads, downloads, and deletions across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs
- Reduced query latency and improved scalability by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then exposed the data through interactive **React** visualizations for business stakeholders
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving error recovery across **100K+** weekly executions

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task **DAGs** and executes them across multi-machine AI agents with retries and timeout handling
- Added resilient scheduling and failure isolation for long-running runs so retries, timeout handling, and dependent-task execution stay resumable and observable as workloads fan out across multi-machine AI agents
