EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Python, Rust, Html/Css

Backend & Frameworks: React, FastAPI, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, Redis, MongoDB

AWS Services: CloudWatch, Lambda, Step Functions, RDS, S3, EC2, CloudFormation, CloudFront, API Gateway

Others: Claude Code, OpenAI Agents SDK, LlamaIndex, Git, CI/CD, Docker, Kubernetes, Google ADK

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a **multi-agent** CRM platform in **Python**, **LangGraph**, **LangChain**, and **FastAPI** for 10,000+ users, routing work across 40+ specialized sub-agents with tenant-aware access control and prompt-injection defenses.
- Shipped a **React** and **TypeScript** workflow builder for creating, running, and managing agent swarms, with durable, resumable execution and live operator feedback for long-running work.
- Built an **AI-native** code-review pipeline by integrating **Claude Code** with a custom **FastMCP** review server, automating daily PR triage across 25-30 PRs/week and cutting manual reviewer load by several hours.
- Created **LlamaIndex**-powered **RAG** agents with **FastMCP** that exposed 160+ backend actions to AI agents, enabling secure automation of CRM workflows and generating ready-to-run **RESTful** API examples.
- Built GitHub Actions **CI/CD** pipelines for AI-agent deployments, using trace-based evals and **automated testing** to catch latency, accuracy, and safety regressions before production.

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** that handled uploads, downloads, and deletions across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs.
- Reduced query latency by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then exposed the data through interactive **React** visualizations for business stakeholders.
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving error recovery across **100K+** weekly executions.

PROJECTS

Dark Factory - orchestrator for PI agent | TypeScript

github.com/ozzyozbourne/dark-factory

- Built a **distributed systems** coding-agent orchestrator that breaks large requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries and timeout handling.
- Designed the control plane for long-running agent jobs, keeping execution resumable and observable so the system can automate code generation and review workflows at scale.
