EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Rust
Frameworks: FastAPI, LangGraph, LangChain, LangSmith, FastMCP, PyTorch, React, Sprint Boot
Databases & Distributed: PostgreSQL, Redis, MongoDB, Kafka, Node.js, Event-driven Architecture
Cloud & AI: Google Cloud, AWS (S3, Lambda, Step Functions, RDS, API Gateway, CloudWatch), CI/CD, Agentic AI

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architected a concurrent multi-agent orchestration system (LangChain, LangGraph), enabling scalable asynchronous workers and coordination across event-driven workflows - Developed a production AI interaction layer translating natural-language intents into validated tool calls across 1000+ endpoints, managing agentic action lifecycles - Engineered low-latency inference by optimizing prompt routing and agent concurrency, reducing end-to-end latency by 60% and lowering API costs by 50%	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on StyleGAN and Stable Diffusion for automated design generation, utilizing CUDA, PyTorch, and LoRA on an HPC cluster for high-volume model training - Integrated ML models into production pipelines using vLLM for optimized inference and Hugging Face for scalable API-based delivery	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed and developed backend workflows and asynchronous task queues (AWS Step Functions, Lambda) to handle long-running data processing jobs and prevent timeouts - Built a cloud-agnostic Storage Service (Python, PostgreSQL, Redis) managing high-volume metadata and payload delivery across GCP and S3 via signed URLs - Developed a RAG support chatbot with a PostgreSQL vector store, enabling automated content discovery and reducing ticket resolution time by 20%	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built an event-driven orchestration system for AI agents, utilizing PTY for CLI IO ownership and Y-crdt for reliable state signaling across distributed machines - Eliminated polling overhead by implementing real-time broadcast updates, ensuring high-performance execution of agentic loops and complex coding tasks
