EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, SQL, Bash, Rust, HTML/CSS

Computer Science: Data structures, algorithms, system design, object-oriented programming, testing, networking

Systems & Web: Distributed systems, Unix/Linux, web application development, REST APIs, FastAPI, Spring Boot, React

AI & Information: AI productivity tools, machine learning, natural language processing, information retrieval, LangGraph, LlamaIndex

Cloud & Data: AWS, Docker, Kubernetes, PostgreSQL, Redis, MongoDB, GitHub Actions CI/CD, OpenTelemetry

PROFESSIONAL EXPERIENCE

Software Engineer

Spense

Phoenix, AZ

Feb 2026 - Present

- Designed, developed, tested, deployed, and maintained a **distributed system** in Python, FastAPI, LangGraph, PostgreSQL, and Redis that routes requests across 40+ services for 10,000+ users
- Built a customer-facing **web application** with TypeScript, React Flow, and Temporal, owning features from ambiguous requirements through design, implementation, testing, deployment, and production improvement
- Developed a production MCP service exposing 160+ validated backend actions with structured APIs, secure access control, monitoring, and fault isolation for large software workflows
- Utilized **AI productivity tools** by integrating OpenAI Codex with Bitbucket, streamlining 25–30 pull-request reviews/week and saving engineers several hours
- Built GitHub Actions CI/CD and OpenTelemetry evaluation pipelines that tested latency, accuracy, and safety, identifying regressions and improving reliability before production releases

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Developed a Java/Spring Boot service with PostgreSQL and Redis, delivering secure REST APIs across AWS S3, Google Cloud Storage, and MinIO via expiring signed URLs
- Improved performance and scalability by applying algorithms and SQL techniques including window functions, materialized views, and indexes, then delivered React visualizations for stakeholders
- Maintained distributed cloud workflows with AWS Step Functions and Lambda, improving timeout handling and error recovery across **100K+ weekly executions**

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript, Docker*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent system that converts requests into dependency-aware task DAGs and executes them across machines with algorithms for scheduling, retries, timeout handling, and failure recovery
