EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Rust, Java

Frameworks: React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, Sprint Boot

Others: Node.js, CI/CD, Git, Kafka, Google Cloud

Databases: PostgreSQL, Redis, MongoDB

AWS Services: Step Functions, CloudWatch, API Gateway, Lambda, EC2, RDS, S3, CloudFormation, CloudFront

AI: Codex, Claude code, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer

Spense

Phoenix, AZ

Feb 2026 - present

- Built operator-facing **control interfaces** with **Python** and **React** for **real-world robotics systems**, translating natural-language intents into **safe, validated tool calls** across **1000+ platform endpoints** for **end-to-end automation**.
- Owned projects **from early concept and prototyping through production deployment** while improving **system reliability, scalability, and observability** in **production environments** with **Langfuse + LangSmith**, debugging **complex systems-level issues across hardware and software** and cutting latency by **60%** and cost by **50%** in **fast-moving, resource-constrained environments** through stronger **technical direction, best practices, and team workflows**.

AI Researcher

Pace Artificial Intelligence Lab

New York City, NY

Sep 2025 - Dec 2025

- Conducted applied research on **StyleGAN** and **Stable Diffusion** for **computer graphics** and **realtime rendering** adjacent workflows using **CUDA**, **PyTorch**, and **LORA (Low-rank Adaptation)** on Pace University's **HPC cluster**, then built secure inference/deployment with **vLLM** and **Hugging Face** for interactive **XR applications** experiments.
- Led workshops for **+50 students** on **CUDA**, **Mojo**, and agent engineering (**LangChain**, **LangGraph**, **LangSmith**), strengthening communication across technical and non-technical teams.

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic storage service with **Python**, **PostgreSQL**, and **Redis** for upload/download/delete across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs, and built a **LangChain + RAG (Retrieval-Augmented Generation)** assistant on **PostgreSQL** vector search that reduced ticket resolution time by **20%**.
- Contributed to an IAM platform with **React**, **Spring Boot**, and **AWS** supporting thousands of users across **30+ applications**, partnering with **Engineering, Operations, Product, and Leadership** to ship safely.

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs | *Crosstern, Ratatui, Y-crdt*

github.com/ozzyozbourne/dark-factory

- Built an event-driven orchestrator with full PTY ownership that validates and logs commands before shell execution, improving control-surface safety for autonomous systems.
- Implemented secure distributed loops with **Y-crdt** to coordinate agents in real time, a pattern transferable to **robots in factories and warehouses** and **orchestration of fleets of robots**.
