EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Others: CI/CD, Google Cloud, Git, Kafka, Node.js
AWS Services: API Gateway, CloudWatch, Lambda, Step Functions, S3, EC2, RDS, CloudFormation, CloudFront
Frameworks: Sprint Boot, React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch
Languages: Python, Java, JavaScript/TypeScript, Rust
Databases: PostgreSQL, Redis, MongoDB
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Developed production system architecture for an MCP layer that translated customer requirements into safe, validated tool calls across 1000+ platform endpoints, standardizing hybrid hardware, software, and network configurations for reliable system integration and stronger deployment implementation oversight - Acted as Tier 2 escalation for integration and design-related failures: partnered with commissioning engineers to ensure installations follow design intent, completed technical review of documentation and configuration, and coordinated fixes across project managers, CAD, estimating, and field teams to reduce rework; applied troubleshooting, analytical triage, and problem-solving to cut latency by 60% and LLM API costs by 50% while improving communication and interpersonal handoffs	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on StyleGAN and Stable Diffusion using CUDA, PyTorch, and LoRA (Low-rank Adaptation) on Pace University's HPC cluster, leading end-to-end model design, training, and evaluation with repeatable runbooks - Utilized vLLM for inference and Hugging Face deployment, documenting serving constraints, validating integration behavior, and hardening runtime reliability under mixed workloads	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built an internal support chatbot using LangChain and RAG with a PostgreSQL vector store, reducing average ticket resolution time by 20% by surfacing runbooks for access control workflows and operational escalation handling - Designed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis for signed upload/download/delete flows across Google Cloud Storage, S3, and MinIO, and contributed to IAM delivery with React, Spring Boot, AWS, API-level network protocols, and AWS Step Functions across 30+ applications to support video surveillance, intrusion detection, and distributed physical security systems integrations	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built a PTY-first orchestrator that inspects and logs every command before shell execution, enforcing design-time controls and runtime traceability for critical automation paths - Implemented distributed coordination loops with Y-crdt and event-driven updates, enabling resilient cross-machine execution and faster incident diagnosis for Tier-2 style escalation scenarios
