EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Rust, Html/Css

Backend & Frameworks: FastAPI, Spring Boot, React, LangGraph, LangChain, FastMCP, Temporal

Databases: PostgreSQL, MongoDB, Redis, Pgvector

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, GitHub Actions, OpenTelemetry, Docker, Kubernetes, Claude Code, Codex CLI

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built **GitHub Actions CI/CD** pipelines for AI-agent deployments with **OpenTelemetry** trace-based tests, flagging latency, accuracy, and safety issues before production releases
- Engineered durable **Temporal** workflow automation with resumable execution and **Redis** status tracking, letting users monitor long-running tasks and recover interrupted work
- Built a **Python, LangGraph, LangChain**, and **FastAPI** multi-agent CRM platform serving **10,000+ users** by securely routing requests across 40+ specialized sub-agents
- Automated CRM operations with **AI agents** through a monitored **FastMCP** server exposing 160+ secured backend actions, replacing manual steps across multiple customer workflows
- Used **Claude Code** and **Codex CLI** to automate deployment pipelines, error monitoring, and automated testing, reducing operational toil and catching failures earlier
- Built an **OpenAI Codex** code-review pipeline with a custom Bitbucket MCP server, automating triage across 25-30 PRs weekly and saving reviewers several hours

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis**, supporting secure file operations across S3, Google Cloud Storage, and MinIO
- Orchestrated long-running jobs with **AWS Step Functions**, improving timeout recovery and reliable execution across **100K+ weekly** Lambda workflows
- Optimized **PostgreSQL** queries with window functions, materialized views, and indexes, then exposed results through **React** dashboards for business stakeholders
- Automated recurring storage-service testing tasks with **AI agents**, helping engineers validate upload, download, and deletion workflows consistently

PROJECTS

FleetFit Graph | *Python, LangGraph, LangChain, Pydantic*

github.com/ozzyozbourne/fleetfit-graph

- Built a **five-stage**, offline workflow that analyzed 8 sample requirements, linked 6 to evidence, exposed gaps, and generated validated bullets plus Markdown and JSON reports
- Added unsupported-claim rejection, structured stage logs, and error handling; verified by **14 tests**, Ruff, strict mypy, and a passing **GitHub Actions CI/CD** pipeline
