Dear Hiring Team,

It is with great pleasure that I submit my candidacy for the **FullStack Developer** role with **Allata**. I bring over three years of professional software engineering experience and a strong academic foundation as a Master of Science in Computer Science graduate from Pace University.

Across my recent engineering roles, I have built the type of full-stack systems your Data Management Platform initiative requires. At Sperse, I designed and maintained **scalable software solutions** for **Data Management Platform** workflows spanning **1000+ platform endpoints**, combining contract-aware APIs, schema validation, and safe execution controls. I supported delivery of cloud-ready releases with **CI/CD** in **Azure Pipelines**, infrastructure as code with **Pulumi**, and repeatable **Microsoft Azure** deployment patterns, while reinforcing quality through automated testing including **Cypress**. At Qualitest, I designed a cloud-agnostic storage service with relational database design patterns and **SQL Server**-compatible schemas, and contributed to an identity and access platform using **React** and **Spring Boot** to deliver production **frontend** and **backend** functionality at scale. This experience maps directly to your expectations around clean, maintainable, well-tested code, cross-functional collaboration, and reliable platform delivery.

I am especially motivated by Allata's purpose to connect, inspire, and create digital outcomes that power client businesses, along with your values of putting family first, treating clients as king, and taking great care of your people. My work in cross-functional technical discussions, code reviews, and collaborative handoffs has prepared me to contribute effectively in distributed, client-facing teams while maintaining a strong ownership mindset in agile, fast-paced environments.

I am excited about the opportunity to help advance Allata's mission of guiding clients to digital excellence through technology-enabled and data-driven solutions. I would welcome the opportunity to discuss how my background can support your team and can be reached at +1 (945) 304-5781 or khanosaid726@gmail.com. Thank you for your time and consideration.

Sincerely,
Osaid Khan
