EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Frameworks: Sprint Boot, React, FastAPI, FastMCP, LangChain, LangGraph, LangSmith, PyTorch
Languages: Java, JavaScript/TypeScript, Python, Rust
Databases: PostgreSQL, Redis, MongoDB
Others: CI/CD, Git, Node.js, Kafka, Google Cloud
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Designed and maintained scalable software solutions for Data Management Platform workflows by translating natural-language intents into safe, validated tool calls across 1000+ platform endpoints (contract-aware APIs, schema validation, Java service boundaries, and Angular operator interfaces), enabling reliable end-to-end automated customer actions. - Supported release engineering with CI/CD in Azure Pipelines and infrastructure as code via Pulumi for repeatable Microsoft Azure deployments, while enforcing quality with automated testing (unit/integration plus Cypress end-to-end checks), code reviews, cross-functional technical discussions, and continuous improvement initiatives.	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted applied research on StyleGAN and Stable Diffusion with CUDA, PyTorch, and LoRA (Low-rank Adaptation) on Pace University's HPC cluster, delivering reproducible model-training workflows focused on reliability and performance. - Built secure inference and deployment workflows with vLLM and Hugging Face using maintainable experiment code, automated evaluation loops, and clear cross-functional handoffs.	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed a cloud-agnostic Storage Service with Python, PostgreSQL, and Redis for uploads/downloads/deletions across Google Cloud Storage, S3, and MinIO (expiring signed URLs, relational database design patterns, SQL Server-compatible schemas). - Contributed to a full-stack Identity & Access Management platform using React, Spring Boot, and AWS, delivering production frontend and backend capabilities for thousands of users across 30+ applications.	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crosstern, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built a secure orchestration runtime that owns CLI IO via PTY, validating each command before bash execution to improve reliability in distributed workflows. - Implemented event-driven, distributed agent loops with Y-crdt state signaling and real-time session broadcasts, reducing polling overhead while preserving debuggability.
