EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust, Html/Css

Backend & Frameworks: FastAPI, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse, Spring Boot

Databases: PostgreSQL, Redis, MongoDB

AWS Services: S3, Lambda, API Gateway, Step Functions, RDS, CloudWatch, EC2, CloudFormation, CloudFront

Others: OpenAI Agents SDK, LlamaIndex, Google ADK, CI/CD, Docker, Kubernetes, Git, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built **customer-facing data products** and **AI-powered and agentic analytics tools** in **Python**, **LangGraph**, **LangChain**, and **FastAPI** that let customers and internal teams ask questions of operational data in **natural language**, routing requests across 40+ specialized sub-agents with tenant-aware access control and **PII handling** for 10,000+ users
- Partnered with **product and design** to ship **customer-facing surfaces** in **React Flow** and **TypeScript** where users query, explore, export, and act on their data through agentic swarms, using **Temporal** for durable, resumable execution and live workflow status
- Created a secure **MCP** server with **FastMCP** that exposed 160+ backend actions through **backend services**, **APIs**, and a lightweight **query layer** for AI agents, powering **real time** workflows over **high-volume data** with built-in monitoring across multiple customers
- Built an **OpenAI Codex** code-review agent integrating a custom Bitbucket MCP server and GitHub Actions **CI/CD**, automating 25-30 PRs/week while trace-based evals flagged latency, correctness, and safety issues before production
- Built **LlamaIndex**-powered **RAG** agents with OpenAI embeddings and **Pgvector** as **semantic layers** over product documentation, generating ready-to-run **REST API** examples and supporting **AI/LLM-powered applications**

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** for uploads, downloads, deletions, and **custom and bulk data exports** across **Google Cloud (GCP)**, **S3**, and **MinIO** via expiring signed URLs
- Optimized **in-dashboard SQL** workloads for **analytical data stores** using **PostgreSQL** window functions, materialized views, and indexes (**Snowflake** and **ClickHouse**-style scan and aggregate tradeoffs), improving query latency and exposing results through **React** visualizations
- Orchestrated large, fast-moving datasets with **AWS Step Functions** and **Lambda**, reducing timeouts and improving error recovery across **100K+** weekly executions while supporting reliable access to data in real time

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built distributed **agentic tooling** that turns large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries, timeout handling, and clear service boundaries
- Modeled execution state so agents and operators can query progress, inspect failures, and resume work safely, emphasizing the same **performance** and **correctness** concerns needed for **data-intensive products**
