EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust

Frameworks: Sprint Boot, React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch

Databases: PostgreSQL, Redis, MongoDB

Others: CI/CD, Kafka, Node.js, Git, Google Cloud

AWS Services: API Gateway, Lambda, Step Functions, CloudWatch, RDS, S3, EC2, CloudFormation, CloudFront

AI: Codex, Claude code, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - present

- Developed **web-based tools/applications** that convert natural-language intents into **safe, validated tool calls** across **1000+ platform endpoints** for reliable automated customer actions
- Translated requirements into **robust well-designed technical solution** delivery using **object-oriented** adapters, reusable policy layers, and rapid QA/architecture iteration across the **software development life cycle**
- Built **event-driven programing** with **LangGraph** and **LangChain** plus tiered APIs for **multi-tiered client/server architectures**, then ran **unit testing** and debug loops (**LangSmith**, **Langfuse**) to fix defects before rollout

AI Researcher

Pace Artificial Intelligence Lab

New York City, NY

Sep 2025 - Dec 2025

- Delivered **full lifecycle project experience** from model design to deployment: researched **StyleGAN** and **Stable Diffusion**, fine-tuned with **CUDA**, **PyTorch**, **LORA**, and deployed inference with **vLLM** and **Hugging Face**
- Applied **Design Patterns** to modular training/inference pipelines and repeatable experiments, improving maintainability and speeding research-to-application handoffs
- Led workshops for **50+** students on GPU programming and AI agents, demonstrating clear communication, **independently and as part of a team** execution, and delivery with **minimal supervision**

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Built an internal support chatbot using **LangChain** and **RAG** with a **PostgreSQL** vector store, reducing ticket resolution time by **20%** and reinforcing a strong **problem-solving** mindset
- Built a cloud-agnostic storage service in **Python**, **PostgreSQL**, and **Redis** for secure upload/download/delete across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs
- Partnered with application analysts, test engineers, and technical writers on integrations spanning **.NET**, **C#**, **ASP.NET**, **XML**, and **SQL Server** interfaces to strengthen rollout and customer-service outcomes

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs | *Crossterm*, *Ratatui*, *Y-crdt*

github.com/ozzyozbourne/dark-factory

- Engineered a PTY orchestration runtime that validates/logs each command before shell execution using **object-oriented** control flows and safety checks
- Implemented distributed **event-driven programing** loops over **Y-crdt** with real-time state propagation for coordinated multi-agent execution without polling
