EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, HTML/CSS, SQL, C++, Rust

Software Engineering: Object-oriented programming/design, architecture, unit/functional tests, automated test suites, test automation

Frameworks & Data: Spring Boot, FastAPI, React, PostgreSQL, MongoDB, Redis, LangGraph, LangChain, LlamaIndex

Cloud & Operations: AWS, S3, Lambda, Step Functions, CloudWatch, Git, CI/CD, Docker, Kubernetes, OpenTelemetry

AI Development: OpenAI Codex, Claude Code, LLM coding assistants, agentic tools, FastMCP, OpenAI Agents SDK

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Architected, designed, implemented, tested, and delivered a highly scalable **Python/FastAPI** multi-agent CRM product, routing requests across 40+ specialized agents with tenant-aware access control for 10,000+ users
- Partnered with engineers, product managers, and user experience stakeholders to build a **React Flow/TypeScript** workflow platform, using Temporal for durable, resumable execution while keeping the customer-facing platform stable and scalable
- Developed test strategies and **test automation** for agentic releases (unit/functional tests, OpenTelemetry trace-based evals, and GitHub Actions **CI/CD**), increasing code coverage and gating latency, accuracy, and safety regressions before production
- Built and critically reviewed code and artifacts generated by **LLM coding assistants** and agentic tools, integrating **OpenAI Codex** with a Bitbucket MCP server to automate 25-30 PRs/week and reduce reviewer effort by several hours
- Implemented a **FastMCP** server exposing 160+ validated backend actions and telemetry metrics, enabling AI agents to automate customer CRM workflows securely while improving operational excellence

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed and implemented a cloud-agnostic Storage Service with **Java, Spring Boot, PostgreSQL**, and **Redis**, applying object-oriented programming/design to scalable file operations across Google Cloud Storage, S3, and MinIO
- Analyzed performance and improved scalability by optimizing **SQL** queries with window functions, materialized views, and indexes, then delivered interactive **JavaScript/React** visualizations for business stakeholders
- Designed automated test cases and orchestrated testable long-running workflows with **AWS Step Functions** and Lambda, improving error recovery across 100K+ weekly executions while preventing timeout failures

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Architected a distributed coding-agent orchestrator that converts large requests into dependency-aware task DAGs and executes them across multiple machines with retries, timeout handling, and automated validation
- Guided agent-based frameworks to generate and critically review implementation artifacts, combining explicit acceptance criteria with failure telemetry to improve repeatability and desired outcomes
