EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages & Data: Python, SQL, Java, TypeScript, Bash, PostgreSQL, Redis, Pgvector

Validation & Quality: Automation pipelines, testing frameworks, automated checks, monitoring, alerting, root cause analysis, data visualization

AI Engineering: Large Language Models (LLMs), agentic workflows, OpenAI, LangGraph, LangChain, LlamaIndex, prompt engineering

Backend & Cloud: FastAPI, REST APIs, microservices, AWS, Docker, Kubernetes, Temporal, Step Functions

Engineering Practices: Git, code review, continuous integration, GitHub Actions CI/CD, OpenTelemetry, clean maintainable code

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Built **AI-assisted and agentic workflows** in Python, FastAPI, LangGraph, and LangChain that chain tools end-to-end across 40+ specialized agents for 10,000+ users, translating ambiguous stakeholder needs into production-ready internal tools
- Designed scalable **automation pipelines** and test strategies using OpenTelemetry traces to replay real production conversations, measure latency and tool-call accuracy, and validate safety across prompts and LLM versions
- Developed GitHub Actions **CI/CD** quality gates with automated checks, monitoring, and alerting that detected regressions before release and improved reliability across continuous software delivery cycles
- Integrated OpenAI Codex with a custom Bitbucket MCP server to automate analysis across 25–30 pull requests/week, generate actionable review summaries, and reduce manual reviewer effort by several hours
- Built LlamaIndex data-processing services over PostgreSQL/Pgvector that use LLMs to summarize technical results and generate ready-to-run REST API examples from product documentation

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Built a cloud-agnostic Java/Spring Boot backend with PostgreSQL and Redis, delivering well-tested data and file-processing workflows across AWS S3, Google Cloud Storage, and MinIO
- Analyzed large relational datasets with **SQL** window functions, materialized views, and indexes, then developed React data visualizations that communicated insights to business stakeholders
- Built production data pipelines with AWS Step Functions and Lambda, improving monitoring, timeout handling, and error recovery across **100K+ weekly executions**

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript, Docker*

github.com/ozzyozbourne/dark-factory

- Built an agentic automation framework that converts large requests into dependency-aware task DAGs and executes them across machines with retries, timeout handling, validation, and failure recovery
