EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust
Frameworks: Sprint Boot, React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch
Databases: PostgreSQL, MongoDB, Redis
Others: Git, CI/CD, Node.js, Google Cloud, Kafka
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Built backend applications in a microservices MCP layer that converts natural-language intents into safe, validated tool calls and RESTful APIs across 1000+ platform endpoints, improving application security, scalability, and reliability - Enabled an observability stack with Langfuse and LangSmith (tracing, structured logs, evaluation hooks) to speed troubleshooting, isolate performance bottlenecks, and strengthen post-production support - Optimized concurrent orchestration with LangChain and LangGraph to improve production deployment stability, reducing end-to-end latency by 60% and lowering LLM API costs by 50%	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted applied research on StyleGAN and Stable Diffusion using CUDA, PyTorch, and LORA (Low-rank Adaptation) on Pace University's HPC cluster with reproducible model-evaluation workflows - Used vLLM for model inference and Hugging Face deployment to build secure model-serving pipelines with measurable throughput gains - Led workshops for 50+ students on GPU programming (CUDA, Mojo) and agent frameworks (LangChain, LangGraph, LangSmith), strengthening technical communication and review practices	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Developed enterprise backend applications and microservices using Java 8, Spring Boot, and Spring Framework to deliver secure RESTful Web Services / APIs with JSON / XML payloads for an Identity & Access Management platform supporting thousands of users across 30+ applications - Implemented resilient batch processing for long-running imports with Spring Batch (Job, Step, Reader, Processor, Writer), replacing timeout-prone flows and improving production reliability for data-heavy workloads - Built persistence layers with JPA / Hibernate and tuned SQL on PostgreSQL relational databases for chatbot and IAM services, reducing average ticket resolution time by 20% - Collaborated with cross-functional teams across QA and DevOps in Agile/Scrum, writing JUnit / Mockito unit testing plus integration testing, managing Maven / Gradle builds, and supporting production deployments	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built a PTY-driven orchestration runtime that validates shell actions and coordinates event-driven agent workflows for safer backend automation - Implemented distributed synchronization with Y-crdt and real-time session broadcasting to eliminate polling-heavy control loops
