EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust

Frameworks: Spring Boot, React, FastAPI, LangChain, LangGraph, LangSmith, PyTorch

Databases: PostgreSQL, Redis, MongoDB

Others: Google Cloud, Git, CI/CD, Node.js, Kafka

AI: AI Agents, Claude code, Codex, Pi coding-agent

AWS Services: S3, EC2, RDS, Lambda, Step Functions, CloudWatch, API Gateway

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - present

- Architected and delivered a **full-stack** AI interaction layer that translates natural-language intents into **safe, validated tool calls** across **1000+ platform endpoints**, bringing to life **AI-driven features** for automated customer actions
- Rapidly prototyped **generative code solutions** (API-aware templates, SDK patterns, and code-generation workflows) using **JavaScript/TypeScript** to accelerate **API** integration and set new **coding patterns** for internal engineering teams
- Implemented a robust **observability** layer using **Langfuse** and **LangSmith** for **tracing, structured logs, and evaluation hooks** to monitor behavior and ensure **integrity and trust** in autonomous system actions
- Developed **concurrent multi-agent** orchestration systems using **LangChain**, enabling scalable execution across complex workflows in a **fast-paced, collaborative, and highly-iterative environment**
- Optimized prompt routing and agent concurrency to maximize **KV-cache hit rate**, reducing end-to-end latency by **60%** and lowering operational costs, providing high-leverage technical improvements to the business

AI Researcher

New York City, NY

Pace Artificial Intelligence Lab

Sep 2025 - Dec 2025

- Conducted research on generative models to create industry-standard designs, utilizing **PyTorch** on high-performance clusters for model training, aligning with Windfall's focus on innovative **AI-driven features**
- Built and served model inference pipelines with **Hugging Face** and **vLLM**, ensuring **impeccable attention to detail** in system performance and secure deployment for large-scale internal tooling
- Led technical workshops on building **AI Agents** with **LangChain** and **LangGraph** for 50+ students, demonstrating the **excellent communication** and mentorship skills central to senior leadership collaboration

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed and developed a cloud-agnostic Storage Service using **Java, Spring Boot**, and **PostgreSQL** that handles complex file operations in **Google Cloud Storage** and **S3** through expiring signed URLs
- Built an internal support chatbot using **LangChain** and **RAG** with a **PostgreSQL** vector store, reducing resolution time by 20% and creating immediate impact through **AI-driven** internal applications
- Developed a full-stack Identity & Access Management platform using **React, Spring Boot**, and **Google Cloud**, connecting multiple services to support thousands of users across 30+ applications with high transparency
- Engineered backend workflows and **APIs** to handle long-running data import jobs, preventing system timeouts and ensuring operational stability for **internal teams** including Engineering and Business Development

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs | *Crossterm, Ratatui, Y-crdt*

github.com/ozzyozbourne/dark-factory

- Built a **collaborative** orchestration tool for AI agents, enabling **real-time** broadcast of updates and eliminating polling overhead through **event-driven** loops and **PTY** command logging

- Implemented secure, distributed loops across machines to provide leverage for developers, ensuring technical **integrity** through validated command execution and automated logging
