EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust
Frameworks: Sprint Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, React, PyTorch
Databases: Redis, PostgreSQL, MongoDB
AWS Services: CloudWatch, API Gateway, Lambda, Step Functions, S3, RDS, EC2, CloudFormation, CloudFront
Others: Google Cloud, Kafka, CI/CD, Node.js, Git
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Built scalable microservices and REST APIs in an MCP layer that translated natural-language intents into safe, validated tool calls across 1000+ platform endpoints - Architected highly available, fault-tolerant event/command pipelines with multi-threading and concurrency in LangChain and LangGraph for dependable execution under burst traffic - Owned cloud services deployments, monitoring, and production support with Langfuse, LangSmith, tracing, structured logs, and evaluation hooks to improve quality and uptime across distributed teams with high-ownership and accountability	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on StyleGAN and Stable Diffusion using CUDA, PyTorch, and LORA (Low-rank Adaptation) on Pace University's HPC cluster for repeatable model tuning - Built reliable inference workflows with vLLM and Hugging Face deployment patterns for production-grade model serving - Served as a mentor to +50 students through workshops on CUDA, Mojo, and AI Agents built with LangChain, LangGraph, and LangSmith	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed cloud services for a storage platform using Python, PostgreSQL, Redis, and DynamoDB-style access patterns with signed URLs across Google Cloud Storage, S3, and MinIO - Built backend integrations for an Identity & Access Management platform with React, Spring Boot, Java (JVM-based language), and AWS, supporting thousands of users across 30+ applications via REST APIs - Developed backend workflows with AWS Step Functions to process long-running imports and prevent AWS Lambda timeouts for reliable automation paths	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Engineered an event-driven orchestration layer that owns CLI IO through PTY, validating and logging each command before shell execution - Built secure distributed ralph loops across machines with Y-crdt signaling and real-time broadcasts for reliable multi-agent execution in IoT automation contexts
