EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: *Java*, *Python*, *JavaScript*, *TypeScript*, *SQL*, Rust, HTML/CSS

Web & Mobile: *React*, *Next.js*, *React Native*, FastAPI, Spring Boot, REST APIs

Cloud & Data: *AWS*, *PostgreSQL*, *MySQL*, *MongoDB*, *Valkey/Redis*, S3, Lambda, Step Functions

Engineering: *Unix*, Git, CI/CD, testing, debugging, performance tuning, Docker, Kubernetes, education technology

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built the **back-end wiring, application logic, and UI** for a CRM workflow product with **Python**, FastAPI, **TypeScript**, and **React**, enabling 10,000+ users to create, run, and monitor durable agent workflows end to end
- Owned features through **design, coding, testing, debugging, and tuning**, pairing Temporal execution with **Valkey/Redis** progress tracking so users could inspect live state and resume long-running workflows reliably
- Developed a secure FastMCP server exposing 160+ backend actions and a **JavaScript/TypeScript** workflow UI, working both independently and with a wide variety of teams to turn user needs into validated, observable product features
- Built GitHub Actions **CI/CD** pipelines with OpenTelemetry trace-based tests that surfaced latency, accuracy, and safety regressions before production, improving release quality across fast-paced development cycles

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed and delivered a cloud-agnostic Storage Service in **Java**, Spring Boot, **SQL**, **PostgreSQL**, and **Redis** on **AWS**, handling uploads, downloads, and deletions across S3, Google Cloud Storage, and MinIO via expiring signed URLs
- Improved application performance by tuning PostgreSQL queries with window functions, materialized views, and indexes, then built interactive **React** and **JavaScript** UI visualizations that made operational data useful to cross-functional stakeholders
- Tested, debugged, and tuned long-running server-side jobs with **AWS Step Functions** and Lambda, reducing timeouts and strengthening error recovery across 100K+ weekly executions while working independently across the full development process

PROJECTS

Dark Factory - orchestrator for PI agent | *TypeScript, Distributed Systems* github.com/ozzyozbourne/dark-factory

- Built a **TypeScript** distributed coding-agent orchestrator that translates large requests into dependency-aware task DAGs and executes them across multiple machines with retries, timeout handling, and end-to-end project ownership
- Applied **excellent programming skills** and strong **analytical-reasoning and problem-solving skills** to design, code, test, debug, and tune scheduling logic for reliable execution across specialized agents
