EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Html/Css, Python, Java, Rust

Frameworks: React, FastAPI, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, MongoDB, Redis

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Built a **React** and **TypeScript** node-based visual workflow platform enabling users to compose, run, and manage **real-time collaborative** agentic pipelines through a **highly interactive user interface**, backed by **Temporal** for durable execution and **Redis** for live progress streaming across concurrent sessions
- Created a production **MCP** server using **FastMCP** that exposed 160+ **API** actions as an extensible **SDK** layer over a multi-tenant backend, enabling external developers to integrate and automate **content management workflows** securely across enterprise customers with built-in monitoring
- Built **GitHub Actions CI/CD** pipelines for AI-agent deployments with **OpenTelemetry** trace-based evals scoring latency, accuracy, and safety — gating every release and enabling **open source**-style reproducible build, distribution, and community-contribution workflows
- Built a **multi-agent** CRM platform using **LangGraph**, **LangChain**, and **FastAPI** supporting **complex data models** across 40+ specialized sub-agents with tenant-aware access control and prompt-injection defenses, serving 10,000+ users
- Engineered **RAG** agents with **LlamaIndex**, **OpenAI** embeddings, and **Pgvector** using **Prompt Engineering** techniques to answer product questions and auto-generate ready-to-run **REST API** examples for developer onboarding

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** handling file operations across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs, satisfying **enterprise scalability**, **security**, **governance**, and **design system** requirements across multi-cloud environments
- Reduced query latency and improved **scalability** by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then surfaced results through interactive **React TypeScript** visualizations for business stakeholders with **complex data model** requirements
- Orchestrated long-running jobs with **AWS Step Functions**, eliminating **Lambda** timeouts and improving error recovery across **100K+** weekly executions in an enterprise workflow

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Led a **0→1 open source** distributed coding-agent orchestrator that decomposes large coding requests into dependency-aware task DAGs and executes them across multi-machine **AI** agents with retries and timeout handling — shipped with documentation targeting **community adoption**
- Architected **TypeScript**-based **SDK** boundaries and plugin-style agent integrations that allow external contributors to extend orchestration behavior, applying the same **extensible software** design patterns used in production **developer tooling** and **API** frameworks
