EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust
Frameworks: React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, Sprint Boot
Databases: PostgreSQL, MongoDB, Redis
AWS Services: API Gateway, Lambda, Step Functions, CloudWatch, RDS, S3, EC2, CloudFormation, CloudFront
Others: CI/CD, Kafka, Google Cloud, Node.js, Git
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Led concept-to-production delivery of an MCP layer translating natural-language intents into safe, validated tool calls across 1000+ platform endpoints, powering mission-critical applications for internal and external users with AI-first workflows, automation, and decision-support systems - Built scalable, cloud-native enterprise applications and AI-powered coding tools across AWS, Azure, or GCP by applying distributed architecture, event-driven systems, and observability aligned to Grafana (LGTM), DataDog, and Splunk patterns, while improving latency by 60% and reducing LLM API costs by 50%	
AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted PyTorch research on StyleGAN and Stable Diffusion with CUDA and LORA (Low-rank Adaptation) on Pace University's HPC cluster, building repeatable training/evaluation pipelines - Taught CUDA, Mojo, and AI agent engineering with LangChain, LangGraph, and LangSmith to +50 students, producing clear technical documentation for cross-functional research teams	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built and released an internal support assistant using LangChain and RAG with PostgreSQL retrieval and data pipelines, creating a decision-support workflow that reduced average ticket resolution time by 20% for operations teams - Designed a cloud-native enterprise application for file lifecycle management using Python, PostgreSQL/MySQL (relational databases), Redis, and object-store NoSQL solutions across Google Cloud Storage, S3, and MinIO; also delivered IAM and Step Functions/Lambda workflows for 30+ applications with cross-functional teams supporting supply chain and manufacturing operations	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built a PTY-first orchestrator that validates and logs each shell action before execution, hardening security in high-trust automation workflows - Implemented event-driven systems coordination with Y-crdt signaling and streaming platforms style updates, enabling distributed agent loops without polling
