EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, HTML/CSS, SQL
Backend & AI: Spring Boot, FastAPI, React, LangGraph, LangChain, FastMCP, LlamaIndex
Databases: PostgreSQL, MongoDB, Redis, Pgvector
Cloud & DevOps: AWS, GitHub Actions, CI/CD, Docker, Kubernetes, CloudFormation, CloudWatch
Testing & Tooling: Pytest, OpenTelemetry, Git, Claude Code, Codex CLI, LangSmith, Langfuse

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Architected and delivered a scalable multi-agent CRM platform with Python, LangGraph, LangChain, and FastAPI, securely routing customer requests across 40+ agents for 10,000+ users - Built a React and TypeScript workflow platform with durable Temporal execution, letting customers create, run, resume, and monitor agent workflows without losing progress - Automated daily code-review work with AI agents and a custom Bitbucket MCP integration, triaging 25–30 pull requests per week and saving reviewers several hours - Guided Claude Code and Codex CLI to automate deployment pipelines, error monitoring, and automated testing, helping engineers catch failures before production releases - Developed a secure FastMCP server exposing 160+ backend actions with built-in monitoring, enabling AI agents to automate customer CRM workflows safely - Built GitHub Actions CI/CD and OpenTelemetry evaluations that tested latency, accuracy, and safety, giving engineers measurable release-quality signals before deployment	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed an object-oriented Java and Spring Boot storage service with PostgreSQL and Redis, giving users consistent file operations across S3, Google Cloud Storage, and MinIO - Orchestrated 100K+ weekly jobs with AWS Step Functions, preventing Lambda timeouts and improving recovery for long-running cloud workflows - Optimized PostgreSQL with window functions, materialized views, and indexes, then delivered React visualizations that made operational data usable for business stakeholders - Used AI agents to automate cloud-storage regression-test drafting, giving engineers repeatable test coverage for role-specific file workflows	

PROJECTS

ProofTrail AI <i>Python, LangGraph, LangChain</i>	github.com/ozzyozbourne/prooftrail-ai
- Built a five-stage agent workflow that analyzes job descriptions, maps candidate evidence, surfaces gaps, generates supported bullets, and rejects uncited claims through a deterministic validation gate - Shipped a recruiter-readable CLI with JSON stage logs and Markdown/JSON reports; verified 15 tests at 99% coverage plus linting, strict type checks, and GitHub Actions CI - Added structured error handling and deterministic offline sample data, letting reviewers run and inspect every workflow stage without API keys
