EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Rust, Python
Others: Google Cloud, Git, CI/CD, Kafka, Node.js
Databases: Redis, PostgreSQL, MongoDB
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, API Gateway
Frameworks: React, Spring Boot, FastAPI, LangGraph, LangChain, LangSmith, PyTorch
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architected a concurrent multi-agent orchestration system for automated actions across complex client/server work-flows, mirroring the complexity of live game systems - Developed an AI interaction layer translating natural-language intents into safe tool calls across 1000+ platform endpoints, ensuring high API reliability and seamless client-side integration - Built an observability layer with LangSmith for tracing and evaluation, enabling the team to monitor behavior, debug live systems, and optimize responsiveness by 60%	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on generative models using CUDA and PyTorch on an HPC cluster, managing the full lifecycle from training to high-performance inference deployment via vLLM - Led workshops on GPU programming and building AI Agents for +50 students, demonstrating strong technical communication and a commitment to mentorship and knowledge-sharing	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed and developed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis for file operations in Google Cloud Storage and S3, supporting GCP integration - Built backend workflows using AWS Step Functions to handle long-running data jobs and participated in code reviews and unit tests to ensure operational stability and system reliability	

PROJECTS

Dark Factory - Real-time AI Orchestrator <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
Developed an event-driven orchestrator for interactive applications using Y-crdt for real-time state synchronization across machines, ensuring low-latency updates and system integrity
