EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust, HTML/CSS

Backend & Data: Spring Boot, FastAPI, REST APIs, PostgreSQL, Redis, data modeling, schema design

AWS Ecosystem: AWS S3, Lambda, Step Functions, RDS, EC2, API Gateway, CloudWatch, CloudFormation

Engineering: Distributed systems, microservices, technical documentation, system design, Git, CI/CD, Docker, Kubernetes

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Architected, built, and operated **backend services and APIs** for a multi-agent CRM platform using **Python, FastAPI**, and **PostgreSQL**, routing requests across 40+ specialized agents with tenant-aware access control for 10,000+ users
- Owned customer-focused project deliveries end to end, partnering with engineers and product stakeholders to clarify product requirements and ship a **TypeScript/React** workflow platform with durable, resumable execution
- Designed service contracts and data models for a **FastMCP** integration exposing 160+ validated backend actions, pairing detailed technical documentation with monitoring to make complex workflows safe for multiple customers
- Improved engineering processes through design and code reviews plus **GitHub Actions CI/CD** and OpenTelemetry trace-based release checks, surfacing latency, accuracy, and safety regressions before production

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed and developed a cloud-agnostic Storage Service in **Java** and **Spring Boot**, applying **data modeling and schema design** in PostgreSQL and Redis to support secure uploads, downloads, and deletions across **AWS S3**, Google Cloud Storage, and MinIO
- Built scalable service workflows in the **AWS ecosystem** with **AWS Step Functions** and Lambda, improving timeout recovery and operational reliability across 100K+ weekly executions
- Optimized PostgreSQL queries with window functions, materialized views, and indexes, then delivered customer-focused React visualizations that clarified requirements and reduced decision latency for business stakeholders

PROJECTS

Dark Factory - Distributed Coding-Agent Orchestrator | *Elixir, TypeScript, Distributed Systems* github.com/ozzy-ozbourne/dark-factory

- Built a multi-machine orchestration service that converts coding requests into dependency-aware task DAGs, coordinates concurrent agents, and handles retries and timeouts for resilient execution
- Defined typed task schemas and observable lifecycle states, documenting system behavior so contributors could review design decisions and extend the platform safely
