EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Rust, Python, Java, JavaScript/TypeScript, Html/Css

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

Backend & Frameworks: FastAPI, Spring Boot, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: Redis, PostgreSQL, MongoDB

AWS Services: CloudWatch, EC2, Lambda, Step Functions, S3, RDS, CloudFormation, CloudFront, API Gateway

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Analyzed and optimized **performance** of production AI software with **OpenTelemetry** trace-based evals in GitHub Actions **CI/CD**, profiling **latency**, accuracy, and safety regressions before deployment
- Engineered durable **multi-threaded** workflow execution with **React Flow**, **TypeScript**, and **Temporal**, coordinating resumable agent swarms while managing task lifetime, retries, and failure recovery
- Added **Redis**-backed progress tracking for long-running **Temporal** workflows, enabling continuous monitoring of process lifetime and live execution status while improving resource efficiency
- Built a **Python**, **LangGraph**, **LangChain**, and **FastAPI** multi-agent CRM platform serving 10,000+ users by routing concurrent requests across 40+ specialized sub-agents with secure access control
- Developed a monitored **FastMCP** core API exposing 160+ validated backend actions to AI agents, enabling engineers to build high-performance automated workflows across multiple customers

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Reduced query **latency** and improved scalability by profiling and optimizing **PostgreSQL** with window functions, materialized views, and indexes, then exposing performance data through **React** visualizations
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and strengthening thread-like task lifetime management and error recovery across **100K+** weekly executions
- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis**, managing concurrent uploads, downloads, and deletions across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a **distributed**, multi-machine coding-agent orchestrator that converts requests into dependency-aware task DAGs and coordinates highly concurrent execution with retries, timeout handling, and resource-aware scheduling
- Designed core orchestration APIs for task prioritization, worker lifetime management, and continuous performance monitoring across independent compute nodes
