EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust
Frameworks: Spring Boot, React, FastAPI, LangGraph, LangChain, LangSmith, PyTorch, FastMCP
Others: CI/CD, GitHub Actions, Kubernetes, Docker, Kafka, Node.js, Git, Agile/SCRUM
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Databases: PostgreSQL, MongoDB, Redis
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architected an integrated system using LangChain and LangGraph to translate natural-language intents into safe, validated tool calls across 1000+ platform endpoints, enabling automated customer actions at scale - Built generative code solutions (API-aware templates and SDK patterns) to accelerate integration with platform APIs, promoting code reuse and reducing technical debt across cross-functional squads - Engineered a robust observability layer for tracing and structured logs to conduct root cause analysis, identify systemic bottlenecks, and improve overall system reliability and low-latency performance - Mentored junior engineers in DevOps and Agile practices, evaluating delivery workflows to drive process improvements and ensure high-quality, documented code deployments using GitHub Actions	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on StyleGAN and Stable Diffusion using CUDA, PyTorch, and LORA on a high-performance HPC cluster, managing training and scaling challenges for production-grade design generation - Utilized vLLM for model inference with Hugging Face deployment, optimizing for low-latency serving and secure model access, while leading workshops on mentorship and technical communication for 50+ students	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed a cloud-agnostic Storage Service using Python, Postgres, and Redis for scalable file operations across AWS S3 and GCS, ensuring system durability and high availability - Engineered an Identity & Access Management platform with React, Spring Boot, and AWS to implement secure practices and compliance for thousands of users across 30+ applications - Developed backend workflows using AWS Step Functions to manage technical debt and ensure reliable cross-functional data delivery, integrating automated testing (JUnit, Selenium) into the CI/CD lifecycle	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
Developed an event-driven orchestrator enabling real-time updates and secure distributed loops, prioritizing latency and durability in CLI-based automation with full security and compliance via PTY
