Dear Hiring Team,

It is with great pleasure that I submit my candidacy for the **Software Engineer & Reporting Administrator** role with **Benedict College**. I bring over three years of software engineering experience and an MS in Computer Science from Pace University, with a track record of building reliable systems that balance long-term ownership with day-to-day user support.

In my current Software Engineer role at Sperse, I own systems across the full lifecycle—**requirements gathering**, implementation, deployment, and maintenance. I built an MCP interaction layer that translates natural-language requests into safe, validated tool calls across **1000+ platform endpoints**, and I developed integration accelerators that standardized **REST APIs** for internal **reporting systems** and **work order tickets**. Previously at Qualitest, I built a support chatbot with LangChain, RAG, and PostgreSQL that reduced average ticket resolution time by **20%**, and I contributed to an IAM platform supporting thousands of users across **30+ applications** with React, Spring Boot, and AWS. This mix of ownership, troubleshooting, and cross-team communication aligns directly with your need for someone who can design, deploy, and steward campus software with strong customer service.

I am especially drawn to Benedict College's mission of delivering **transformative learning experiences** through quality programming for a diverse student body. Your emphasis on **innovation**, **customer service**, and **community engagement** strongly matches how I work. As an AI Researcher at Pace AI Lab, I delivered full model lifecycle work with CUDA, PyTorch, and LoRA, and I mentored **50+** students through workshops on GPU programming and AI agent engineering—experience that maps well to the communication and mentorship expectations in this role, including supporting interns and partnering with non-technical stakeholders.

I would be honored to contribute to Benedict College's goal of preparing students with strong cultural and professional competencies for the global marketplace. I would love to discuss my interest in this position with your team and can be reached at +1 (945) 304-5781 or khanosaid726@gmail.com. Thank you for your time and consideration.

Sincerely,
Osaid Khan
