EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, API Gateway
Frameworks: Spring Boot, React, FastAPI, LangGraph, LangChain, LangSmith, FastMCP, PyTorch
Others: Google Cloud, CI/CD, Kafka, Git, Node.js
Databases: PostgreSQL, Redis, MongoDB
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Engineered a middleware interaction layer to translate intents into safe, validated API calls across 1000+ endpoints, automating enterprise integration and reducing latency by 60% through optimized routing - Developed scalable software including API-aware templates and SDK patterns to accelerate cloud connectivity and ensure digital transformation consistency across the platform - Architected a multi-agent system using LangGraph, enabling reliable microservice deployments and coordination of complex hybrid cloud workflows with a robust CloudWatch observability layer - Optimized system concurrency to reduce infrastructure overhead by 50%, improving the scalability of cloud-native integrations while maintaining high-availability for enterprise customers	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Leveraged CUDA and PyTorch on a HPC cluster to develop complex generative models, presenting technical ideas and architectural concepts to internal research teams and stakeholders - Led technical workshops on GPU programming and AI Agent architecture for 50+ students, demonstrating strong communication skills and the ability to explain complex concepts	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Contributed to a large-scale Identity & Access Management platform using Java, Spring Boot, and AWS, supporting thousands of users across 30+ enterprise applications - Designed and implemented a cloud-agnostic integration service using Python and Redis that seamlessly handles file operations across S3, Google Cloud, and MinIO via signed URLs - Developed robust backend workflows using AWS Step Functions to manage long-running data import jobs, ensuring reliable enterprise software synchronization and preventing system timeouts	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built a distributed orchestrator for CLI execution, ensuring full ownership of IO via PTY and implementing secure command-validation logic for remote machine operations - Utilized Y-crdt for real-time state synchronization, enabling event-driven loops that eliminate polling overhead in complex integration environments
