EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Python, Rust, Html/Css

Backend & Frameworks: React, FastAPI, Spring Boot, FastMCP, LangGraph, LangChain, LangSmith, Langfuse

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

AWS Services: API Gateway, Lambda, Step Functions, CloudWatch, S3, EC2, RDS, CloudFormation, CloudFront

Databases: PostgreSQL, Redis, MongoDB

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Architected and implemented **TypeScript** and **React** APIs and intuitive interfaces for a **shared UI framework**, enabling users to create, run, and manage agentic swarms across devices through durable, resumable **Temporal** execution
- Designed **low-level networking and authentication APIs** in **FastAPI** and **FastMCP shared frameworks**, exposing 160+ secure backend actions with validated contracts, monitoring, and integration guidance for adoption across multiple customers
- Built a **multi-agent** CRM platform with **Python**, **LangGraph**, and **LangChain**, routing requests across 40+ specialized sub-agents while preserving authentication context and delivering business-critical features to 10,000+ users
- Built tests and **CI/CD** documentation for AI-agent deployments with GitHub Actions and OpenTelemetry trace-based evaluations, improving **quality and attention to detail** by flagging latency, accuracy, and safety issues before production
- Collaborated cross-functionally on an OpenAI Codex and Bitbucket MCP code-review integration, automating daily triage across 25-30 PRs/week and reducing manual reviewer load by several hours

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed and implemented a cloud-agnostic **Java** and **Spring Boot API** for file uploads, downloads, authentication through expiring signed URLs, and deletions across Google Cloud Storage, S3, and MinIO, backed by **PostgreSQL** and **Redis**
- Implemented business-critical features across cloud platforms with **AWS Step Functions** and **Lambda**, improving error recovery and preventing timeouts across **100K+** weekly executions
- Worked with cross-functional business stakeholders on integration and adoption of optimized **PostgreSQL** APIs (window functions, materialized views, and indexes) and intuitive **React** interfaces, reducing query latency and improving scalability

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Architected a **TypeScript** distributed-system framework that turns large coding requests into dependency-aware task DAGs and executes them across multi-machine agents with retries and timeout handling
- Demonstrated aptitude to **independently learn new languages and frameworks** while designing shared orchestration **APIs**, tests, and documentation with strong programming fundamentals, modular integration, and reliable multi-platform execution
