Dear Hiring Team,

I am excited to apply for the **Integration Engineer** role at **Sevita**. I bring 3+ years of backend and integration engineering experience, plus a Master of Science in Computer Science from Pace University, and I am motivated by Sevita's mission of delivering quality, community-based services that lead to growth and independence.

In my recent Software Engineer role at Sperse, I modernized legacy point-to-point integrations into a loosely coupled, event-driven architecture using **Confluent Kafka** (topics, producers, consumers, **Schema Registry**, and **Kafka Connect**), and delivered independently deployable micro services across 1,000+ platform endpoints. I also built and operated integration APIs in **Java**, **Python**, and **Node.js**, standardized service contracts, and partnered with DevOps and Cloud teams to deliver secure, fault-tolerant services through **CI/CD pipelines**, **Azure DevOps**, **Docker**, and **Kubernetes**. This work directly aligns with Sevita's core responsibilities around integration design, deployment, and reliability.

At Qualitest, I designed a cloud-agnostic storage integration service using **Python**, **PostgreSQL**, and **Redis** across **Google Cloud Storage**, **S3**, and **MinIO**, and contributed to an IAM platform in **React**, **Spring Boot**, and **AWS** supporting 30+ applications with enterprise integration patterns and secure inter-service communication. I also maintain strong monitoring and troubleshooting discipline through **observability/logging** tooling (**Langfuse**, **LangSmith**) and collaborative, cross-functional delivery habits reinforced through technical workshops for 50+ engineers and students.

I am especially drawn to Sevita's focus on **integrity** and **respect**, and to your commitment to helping people live fuller, more independent lives through high-quality support. I would value the opportunity to contribute this integration engineering background to Sevita's mission and help scale reliable, event-driven services that support your teams and the individuals you serve. I can be reached at +1 (945) 304-5781 or khanosaid726@gmail.com. Thank you for your time and consideration.

Sincerely,
Osaid Khan
