

# Osaid Khan

+1 (945) 304-5781 | [khanosaid726@gmail.com](mailto:khanosaid726@gmail.com) | [www.linkedin.com/in/-osaid-khan/](https://www.linkedin.com/in/-osaid-khan/) | [github.com/ozzyozbourne](https://github.com/ozzyozbourne)

## EDUCATION

### Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

### Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

## TECHNICAL SKILLS

**Others:** Kafka, CI/CD, Node.js, Git, Google Cloud

**Languages:** Java, Python, JavaScript/TypeScript, Rust

**Frameworks:** Sprint Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, React, PyTorch

**AWS Services:** API Gateway, Lambda, Step Functions, CloudWatch, EC2, RDS, S3, CloudFormation, CloudFront

**Databases:** PostgreSQL, Redis, MongoDB

**AI:** Codex, Claude code, Pi coding-agent

## PROFESSIONAL EXPERIENCE

### Software Engineer

Phoenix, AZ

Spense

Feb 2026 - present

- Modernized legacy **point-to-point** integrations into a **loosely coupled, event-driven architecture** with **Confluent Kafka** (topics, producers, consumers, **Schema Registry**, **Kafka Connect**) and **pub/sub messaging pattern** plus **stream processing** design, delivering **independently deployable, scalable** micro services across **1000+** **platform endpoints**
- Built and operated integration **APIs** in **Java**, **Python**, and **Node.js**; standardized schemas/service contracts and monitored **Kafka clusters** via **observability/logging** (**Langfuse**, **LangSmith**) to reduce **production issues/bug fixes**, enforce **data quality** and **SLAs**, and ship secure **fault-tolerant, highly available** services through **CI/CD pipelines**, **Azure DevOps**, **Docker**, and **Kubernetes**

### AI Researcher

New York City, NY

Pace Artificial Intelligence Lab

Sep 2025 - Dec 2025

- Built development, testing, and deployment workflows for GPU services on Pace University's HPC cluster using **CUDA**, **PyTorch**, **LoRA**, and **vLLM**, improving reliability across training and inference environments
- Delivered workshops for **+50** students on **LangChain**, **LangGraph**, and GPU tooling, strengthening technical communication and knowledge sharing

### Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic storage integration service with **Python**, **PostgreSQL**, and **Redis**, exposing secure **APIs** and service contracts across **Google Cloud Storage**, **S3**, and **MinIO** to replace brittle point-to-point exchanges
- Contributed to an IAM platform using **React**, **Spring Boot**, and **AWS** supporting thousands of users across 30+ applications, applying **enterprise integration patterns (EIPs)** and security best practices for inter-service communication

## PROJECTS

### Dark Factory - Orchestrator for AI coding CLIs | *Crosstern, Ratatui, Y-crdt*

[github.com/ozzyozbourne/dark-factory](https://github.com/ozzyozbourne/dark-factory)

- Built **event-driven** orchestration around CLI sessions by owning PTY IO, validating every command, and emitting real-time execution events for downstream automation
- Implemented distributed coordination with **Y-crdt** using **pub/sub messaging pattern** semantics, enabling low-latency multi-machine collaboration without polling
