EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust

Frameworks: React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, Sprint Boot

Databases: PostgreSQL, MongoDB, Redis

Others: Node.js, Git, CI/CD, Google Cloud, Kafka

AWS Services: Step Functions, Lambda, API Gateway, CloudWatch, RDS, S3, EC2, CloudFormation, CloudFront

AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Spense

Feb 2026 - present

- Built **web-based internal tools and dashboards** for non-technical teams with **Python** and **TypeScript/JavaScript**, translating natural-language requests into **safe, validated tool calls** across **1000+ platform endpoints**
- Built **data ingestion utilities** for partner **spreadsheets, CSVs, and exports** that loaded records into **structured databases** via **SQL** validation and transformation rules (**ETL concepts**), plus **automation scripts** and lightweight backend jobs that reduced repetitive manual work
- Shipped **desktop or browser-based GUI tools** (browser-first **React**) for **data cleaning, validation, mapping, and transformation**, enabling **admin interfaces** for **browsing, searching**, and managing database content, with **export and reporting tools** for on-demand stakeholder outputs

AI Researcher

New York City, NY

Pace Artificial Intelligence Lab

Sep 2025 - Dec 2025

- Built Python training/transformation pipelines for **StyleGAN** and **Stable Diffusion** with **CUDA, PyTorch, and LORA (Low-rank Adaptation)** on Pace University's **HPC cluster**
- Utilized **vLLM** with **Hugging Face** deployment and API-driven serving workflows, ensuring secure, efficient model inference with repeatable validation checks
- Conducted workshops on **CUDA, Mojo, and AI agents** with **LangChain, LangGraph, and LangSmith** for **+50 students**, translating complex systems into usable workflows for mixed technical audiences

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service using **Python, PostgreSQL, and Redis** for ingestion, uploads, downloads, and deletions across **Google Cloud Storage, S3, and MinIO** via expiring signed URLs
- Developed backend orchestration with **AWS Step Functions** for long-running data import jobs from structured files, preventing **AWS Lambda** timeouts and improving recurring-load reliability
- Contributed to an Identity & Access Management platform using **React, Spring Boot, and AWS**, delivering internal **admin interfaces** supporting thousands of users across **30+ applications**

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs | *Crossterm, Ratatui, Y-crdt*

github.com/ozzyozbourne/dark-factory

- Enables secure **automation scripts** and full CLI IO ownership via **PTY**, validating and logging each command before execution
- Provides event-driven orchestration and distributed state sync with **Y-crdt**, broadcasting **real-time** run updates without polling overhead
