EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages & Full Stack: Java, Python, JavaScript/TypeScript, React, HTML/CSS, Spring Boot, FastAPI, REST APIs
AI/ML: GenAI APIs, Azure OpenAI, ML models, prompt engineering, LLM APIs, LangChain, Semantic Kernel, Hugging Face, TensorFlow

Databases & Cloud: PostgreSQL, MongoDB, Redis, relational databases, NoSQL databases, AWS, Azure, GCP

DevSecOps & Testing: Git, GitHub CoPilot, Azure DevOps, CI/CD pipelines, Docker, Kubernetes, containerization, automated testing, secure coding practices

Engineering: Agile practices, product requirements, user stories, software design principles, coding best practices, communication, collaboration, problem-solving

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Designed, developed, tested, and deployed **full stack software applications (UI, API, Data)** using **React, TypeScript, Python, and FastAPI**, enabling 10,000+ users to build and run durable AI workflows
- Integrated **AI capabilities** through **GenAI APIs, prompt engineering, LLM APIs, LangChain, and LlamaIndex**; routed requests across 40+ specialized agents with validated tool calls and tenant-aware access control
- Built **CI/CD pipelines** with GitHub Actions, **automated testing**, and OpenTelemetry trace-based evaluations, applying **secure coding practices** to deliver high quality software and flag issues before production deployment
- Gathered and refined **product requirements** and **user stories** with **cross-functional teams**; participated in **peer reviews** of code, solution designs, and configurations, then added Redis observability to resolve production incidents and service requests

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Developed and supported a cloud-native **Java** and **Spring Boot** Storage Service with **PostgreSQL** and **Redis**, exposing secure APIs across **AWS S3, Google Cloud Storage (GCP)**, and MinIO via expiring signed URLs
- Improved scalability by applying **software design principles**, coding best practices, and **Database concepts, design, and development** (window functions, materialized views, indexes), then delivered **responsive UI/UX** in **React**
- Deployed resilient services with **AWS Step Functions** and Lambda, reducing timeouts and improving error recovery across 100K+ weekly executions while supporting production incident investigation

PROJECTS

Dark Factory - Orchestrator for PI Agent | *Elixir, TypeScript, Docker*

github.com/ozzyozbourne/dark-factory

- Built a containerized **microservices** orchestrator that converts coding requests into dependency-aware task DAGs and executes them across distributed AI agents with retries, timeouts, and resilient failure handling

AI Optimization Virtual Lab | *Python, LangGraph, Hugging Face*

github.com/ozzyozbourne

- Built an academic **AI/ML** project that orchestrates LLM-guided CUDA optimization and NVIDIA Nsight profiling, then fine-tuned Qwen3-8B with LoRA to reduce prompt tokens by roughly 70% at equal task accuracy
