EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Rust, Html/Css

Backend & Frameworks: FastAPI, REST APIs, Spring Boot, React, LangGraph, LangChain, FastMCP, Temporal

Databases: PostgreSQL, MongoDB, Redis, Pgvector

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, Docker, Kubernetes, OpenTelemetry, GitHub Actions, Claude Code, Codex CLI

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a production **Python, FastAPI, and LangGraph** multi-agent platform that routes work across 40+ specialized agents with secure access controls, supporting **10,000+ users**
- Delivered **160+ monitored backend actions** through a FastMCP integration layer, enabling AI agents to automate customer CRM workflows securely across multiple tenants
- Built a **React, TypeScript, and Temporal** workflow platform so users could configure, launch, monitor, and resume long-running agent deployments from one interface
- Automated engineering work with **AI agents** by integrating OpenAI Codex with Bitbucket, triaging **25–30 PRs weekly** and saving reviewers several hours of manual effort
- Used **Claude Code and Codex CLI** to automate deployment pipelines, error monitoring, and automated testing, helping engineers catch failures before production releases
- Built OpenTelemetry trace-based evaluations into **GitHub Actions CI/CD**, flagging latency, accuracy, and safety issues before AI-agent deployments reached users

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Built a cloud-agnostic **Java and Spring Boot API** for uploads, downloads, and deletions across S3, Google Cloud Storage, and MinIO using secure expiring URLs
- Orchestrated durable backend jobs with **AWS Step Functions**, improving timeout recovery across **100K+ weekly executions** and keeping large workloads moving reliably
- Optimized **PostgreSQL** queries with indexes, window functions, and materialized views, then presented the results in React dashboards for business stakeholders
- Automated a role-specific engineering task with **AI agents**, reducing repetitive manual steps so the team could focus on production delivery

PROJECTS

Care Deploy Evidence | *Python, FastAPI, LangGraph, LangChain*

github.com/ozzyozbourne/care-deploy-evidence

- Built an offline-first **five-stage LangGraph workflow** that analyzes job requirements, maps evidence, exposes gaps, generates grounded bullets, and validates every claim through a CLI and FastAPI
- Added structured logs, sensitive-claim safeguards, and GitHub Actions CI; **18 tests pass at 97.98% coverage** and the sample truthfully supports 9 of 10 requirement categories
