EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, Rust, Python, JavaScript/TypeScript
Others: Operating Systems, Networking, Multi-threading, Algorithms, Git, CI/CD, Kafka
Frameworks: FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, React, Sprint Boot
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Databases: PostgreSQL, MongoDB, Redis
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architected multi-threaded orchestration using LangChain and LangGraph, enabling high-performance coordination across complex industrial workflows - Designed reusable software modules and SDK libraries to accelerate system integration and ensure standardized implementation across multiple products - Built observability with Langfuse and LangSmith, enabling low-level troubleshooting of software problems via structured logs and evaluation hooks	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Leveraged CUDA and PyTorch on an HPC cluster to develop generative models, utilizing low-level GPU programming and multi-threading - Led technical workshops on GPU programming, Mojo, and Algorithms, mentoring 50+ students on systems-level software design	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Developed a high-availability Storage Service using Python and Redis implementing networking principles for operations across S3, GCS, and MinIO - Engineered common software modules using AWS Step Functions to manage long-running jobs, preventing timeouts via robust concurrency management Troubleshoot and debugged production software, implementing bug fixes and technical documentation to ensure long-term system stability	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Engineered a multi-threaded PTY orchestrator with event-driven loops to eliminate polling overhead and ensure low-latency communication - Utilized distributed algorithms and Y-crdt to signal across machines, providing a scalable solution for concurrent agentic execution
