Dear Hiring Team,

I am writing to apply for the Batch Developer (UNIX/C/SQL) role with Gainwell Technologies. I bring over three years of experience building and supporting production backend systems, SQL-heavy data services, and long-running job orchestration, along with a Master of Science in Computer Science from Pace University.

In my current role as a Software Engineer at Sperse, I build a **Python / FastAPI** multi-agent CRM backend that routes requests across 40+ specialized sub-agents for 10,000+ users, and I designed a **React Flow / Temporal / Redis** workflow layer for resumable jobs and live execution state. I also run **GitHub Actions CI/CD** pipelines with **OpenTelemetry** trace-based eval suites, automate daily PR triage with **OpenAI Codex** and a custom Bitbucket **MCP** server, and maintain a production **FastMCP** service with monitoring and validation. That work maps directly to the coding, testing, debugging, implementation, documentation, and **quality assurance** discipline this role requires.

At Qualitest, I designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** backed by **PostgreSQL** and **Redis** across **Google Cloud Storage**, **S3**, and **MinIO**, optimized **SQL** query latency with window functions, materialized views, and indexes, and orchestrated 100K+ weekly jobs with **AWS Step Functions** while maintaining deployment documentation and operational runbooks in a **Unix/Linux** environment. Those projects strengthened my production support mindset and my ability to analyze requirements, prepare documentation, and resolve operational issues across the full **software development life cycle**. Gainwell's mission to improve outcomes, enhance provider experiences, safeguard program integrity, and address fraud, waste, and abuse strongly resonates with me, and I am drawn to the company's culture of collaboration and innovation in public health.

I would welcome the opportunity to contribute to your team and mission. I can be reached at +1 (945) 304-5781 or khanosaid726@gmail.com.

Sincerely,
Osaid Khan
