EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Go, Java, Python
Backend & Frameworks: React, FastAPI, Spring Boot
AWS Services: API Gateway, Lambda, Step Functions, S3, RDS, EC2, CloudWatch, CloudFormation, CloudFront
Databases: PostgreSQL, Redis, MongoDB
Others: Git, CI/CD, Docker, Kubernetes
AI/Agents: LangGraph, LangChain, FastMCP, LangSmith, Langfuse, LlamaIndex, Claude Code, Codex

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
• Drove Web SDK Development and API Development for a public-facing JavaScript/TypeScript SDK and developer APIs, refactoring 500+ operations into typed dispatchers and replacing 60+ RESTful APIs with documented contracts. • Designed distributed systems with LangGraph, LangChain, Langfuse, and FastAPI, routing requests to 40+ sub-agents while preserving backend service boundaries for user facing applications. • Built task-scoped routing for Web SDKs, reference applications, and Partner Integrations, reducing context bloat and improving tool-selection accuracy by 90%. • Implemented lazy-loaded skills with tenant-aware access control (JWT, tenant, role propagation across agents/backend calls), aligning server-side development with third-party developers' workflows.	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
• Built an agent-evaluation pipeline with LLM judges and reward models to rank multi-step tool-use runs, surfacing machine learning behavior before partner-facing changes ship. • Implemented a LangGraph eval pipeline to score runs, select high-performing traces, and tune prompts, increasing tool-call success by 50%. • Supported Cross-functional Collaboration by translating reliability data, failure modes, and technical concepts into prompt, API, and workflow design guidance.	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
• Optimized PostgreSQL database interactions behind RESTful APIs with window functions, materialized views, and indexes to minimize latency across full stack workflows. • Delivered Web Application Development across modern web frameworks with React, Spring Boot, and D3.js, building user-facing web components and client-side application logic. • Orchestrated backend services with AWS Step Functions and AWS Lambda, reducing Lambda timeouts and improving error recovery across 100K+ weekly executions.	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript</i>	github.com/ozzyozbourne/dark-factory
• Built a TypeScript developer-facing orchestrator for distributed systems, splitting coding requests into task DAGs executed across multi-machine AI agents with retries and timeouts. • Exposed reference implementations (typed task contracts, backend service boundaries, integration tooling) modeling SDK/API ergonomics for developer-focused libraries.
