EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust, Html/Css

Backend & Frameworks: Spring Boot, FastAPI, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, Redis, MongoDB

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a **multi-agent** CRM platform with **Python**, **LangGraph**, **LangChain**, and **FastAPI**, serving 10,000+ users by routing requests across 40+ specialized sub-agents with secure access control and traceable tool execution
- Built a **React Flow** and **TypeScript** visual workflow platform for creating, running, and managing agentic swarms, using **Temporal** for durable, resumable execution and **Redis**-backed progress tracking for long-running jobs and **scalable pipelines**
- Created a **FastMCP** server that exposed 160+ backend actions to AI agents, pairing **Pydantic** validation, **API design**, and **OpenTelemetry** instrumentation to automate CRM workflows safely across multiple customer environments
- Built **GitHub Actions CI/CD** pipelines with **Python** and **Bash** automation plus OpenTelemetry trace-based evals to automate daily PR triage across 25-30 PRs/week, replay real production conversations, and flag latency, accuracy, and safety regressions before release

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** that handled uploads, downloads, and deletions across **AWS S3**, **Google Cloud Storage**, and **MinIO** via expiring signed URLs, simplifying **system integration** for client deployments and **customer infrastructure**
- Reduced query latency and improved scalability by optimizing **PostgreSQL / SQL** with window functions, materialized views, and indexes, then exposed the data through interactive **React** visualizations for business stakeholders
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving **production reliability** and error recovery across **100K+** weekly executions

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries and timeout handling
- Added failure isolation and execution tracing so long-running runs stay observable and resilient across chained tasks and deployments
