EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Others: CI/CD, Git, Node.js, Google Cloud, Kafka

AWS Services: CloudFormation, CloudWatch, API Gateway, Step Functions, EC2, Lambda, RDS, S3, CloudFront

Languages: Python, Rust, JavaScript/TypeScript, Java

Frameworks: FastAPI, FastMCP, LangGraph, LangChain, LangSmith, React, Sprint Boot, PyTorch

Databases: PostgreSQL, Redis, MongoDB

AI: Codex, Claude code, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - present

- Built **internal platforms** and **internal tools** that translated natural-language intents into **safe, validated tool calls** across **1000+ platform endpoints**, enabling **self-service systems** to **deploy code**, **provision infrastructure**, and **debug issues**.
- Designed **CLI tools** and **internal APIs** (API-aware templates, SDK patterns, code-generation workflows) that standardized **infrastructure as code patterns** with **Terraform**, **Helm**, and **Kustomize** and accelerated **developer workflows**.
- Implemented a **Kubernetes platform** for **Docker** workloads with repeatable **deployment patterns**, policy **guardrails**, **GitOps principles**, and **container orchestration** discipline; paired with **observability tooling** (**Langfuse**, **LangSmith**, tracing, structured logs) and **CI/CD improvements** that cut latency by **60%** and API costs by **50%**.

AI Researcher

New York City, NY

Pace Artificial Intelligence Lab

Sep 2025 - Dec 2025

- Built reproducible **StyleGAN** and **Stable Diffusion** training workflows on an **HPC cluster** with **CUDA**, **PyTorch**, and **LORA (Low-rank Adaptation)**, emphasizing repeatability, rollback safety, and operational rigor.
- Shipped **vLLM** inference and **Hugging Face** deployment pipelines with explicit **deployment patterns**, runtime **observability**, and secure serving.
- Ran **internal workshops** for **+50** students on **CUDA**, **Mojo**, **LangChain**, **LangGraph**, and **LangSmith**, strengthening debugging discipline and **developer documentation** habits.

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service with **Python**, **PostgreSQL**, and **Redis** exposing signed-URL **APIs** across **Google Cloud Storage**, **S3**, and **MinIO**, supporting multi-cloud **AWS** and **Azure services** integration patterns.
- Contributed to an IAM platform with **React**, **Spring Boot**, and **AWS** supporting thousands of users across **30+ applications**, balancing delivery speed with **security**, **compliance**, and **reliability requirements**.
- Implemented **AWS Step Functions** workflows to eliminate **AWS Lambda** timeout failures and improve production **reliability** under long-running load.

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs | *Crossterm*, *Ratatui*, *Y-crdt*

github.com/ozzyozbourne/dark-factory

- Implemented full CLI I/O ownership through **PTY** interception with command-level safety checks and shell execution **guardrails**.
- Built an **event-driven** orchestration model that broadcasts **real-time** updates, improving platform **observability** and eliminating polling.
